

ABOUT SECTION 508 ACCESSIBILITY

FindAnyFloor.com® has set itself the goal of making all of its websites Section 508 compliant.

Section 508 compliant websites are fully accessible to all users, including people with disabilities. An amendment to the Rehabilitation Act, Section 508 requires all Federal agencies to have fully accessible websites. However, this law does not apply to the private sector. FindAnyFloor.com is intent on persuading other businesses to follow its lead and make their websites fully accessible.

Among FindAnyFloor.com's current Section 508 compliant features are: resizable text, screen reader capabilities, limited use of Flash, tab-through functionality, and closed captions on videos with sound.

The company is also working on accessible alternatives to some of its more complex applications and features. The goal is for all users to have access to FindAnyFloor.com and to be able to find the best floor covering information resource possible.
